

## H & R Gray Logistics and Storage Hub Bandeath Industrial Estate

### Introduction

H & R Gray Haulage is a local, family run business that has been operating for more than 30 years – providing professional and reliable road haulage services across Scotland and throughout the UK.

The business grew out of a farming enterprise, moving to it's base at Bandeath Industrial Estate in 2001, where it has successfully branched out to pallet distribution and vehicle maintenance to a growing number of local hauliers and operators.

This proposed development seeks to create capacity for H & R Gray Haulage to expand their current base, so that the business can continue to thrive throughout the 21st Century. The development will help H & R Gray Haulage to grow, to employ more people within the local area, and to continue to serve and support many local businesses based in Stirling and around the Central Belt.

The project is based on sustainable economic and environmental ideas; providing more capacity for storage and distribution of goods, increased provision for vehicle maintenance services, staff training and welfare – and all with a focus on creating renewable energy and enhancing biodiversity.

The proposal will enable H & R Gray to grow and support the local economy; for the next 30 years – and beyond.
